

# CAP-ENV-PD Series

The Toughest and Most Reliable Infrared and  
Ultrasound Window

## Look & Listen Simultaneously

The built-in Ultrasound Inspection port in the CAP-ENV PD can be used to detect signs of arcing, tracking, and corona in electrical equipment. with minimal Diffraction and are more effective than scanning the seam on enclosed systems.

## Arc Containment Tested

The CAP-ENV-PD Series was successfully tested to the IEC 62271-200 standard for arc containment on metal enclosed switchgear assemblies.

## UL Listed

Having passed rigorous standards and testing, our inspection windows are UL Listed (E491496). This demonstrates our dedication to continued safety and security in the ever-changing world of electrical power and distribution.

The CAP-ENV-PD features a reinforced environmentally sealed door design while also providing a large visually-clear infrared (IR) transmissive viewing area. The CAP-ENV-PD also comes equipped with a versatile port for ultrasound inspections – an ideal way to identify electrical faults. Initially developed for MV transformer and switchgear applications, the CAP-ENV-PD is a perfect combination solution for medium and high voltage applications where both IR and Ultrasound inspections are desired.
